

DAY 2 · AI PROMPTS

5-Prompt Research Pack

#	USE CASE	TOOL	PROMPT (COPY & ADAPT)
1	Synthesis	Claude	Analyse these interview notes. Group into 5–7 themes. For each: name, 2 supporting quotes, design implication. Flag assumptions.
2	Competitive scan	Perplexity	Research how [sector] services handle [task]. List 3 patterns, 2 gaps, 1 risk. Cite sources. Note what may not transfer to our context.
3	Persona draft	Claude	From these JTBD statements and research themes, draft one persona: goals, frustrations, behaviours, quotes, design implications. Mark anything inferred vs evidenced.
4	Journey map	Claude	Map 4–5 phases for [user] completing [task]. Per phase: actions, thoughts, emotions, opportunities. Highlight emotional low points.

Always human-review AI output before it enters a deliverable. AI accelerates — it does not replace judgment.

DAY 2 · GUIDE

Semi-Structured Interview Guide

- ▶ **Opener (2 min):** 'Tell me about the last time you [task]. Walk me through it step by step.'
- ▶ **Core (15 min):** 'What were you trying to accomplish?' · 'What was hardest?' · 'What did you do when stuck?'
- ▶ **Probing ladder:** 'Tell me more.' · 'Why was that?' · 'What happened next?' · 'How did that make you feel?'
- ▶ **Neutrality rules:** Never lead ('Was it confusing?'). Ask open questions. Silence is a tool — wait 3 seconds.
- ▶ **Close (2 min):** 'Anything I should have asked?' · 'Who else should I talk to?'

Participant

Role · context · date

Key quote 1

DAY 2 · TEMPLATE

JTBD Statement

- ▶ **Format:** When [situation], I want to [motivation], so I can [expected outcome].
- ▶ **Example 1:** When I need to submit a permit application, I want to know exactly which documents are required, so I can complete it in one visit.
- ▶ **Example 2:** When reviewing AI-generated insights, I want to see the source data, so I can trust the recommendation before acting on it.

Primary JTBD

When... I want to... so I can...

Secondary JTBD

When... I want to... so I can...

Forces pushing change

What's driving the user to act now?

DAY 2 · CANVAS

Experience Map

PHASE	ACTIONS	THOUGHTS	EMOTIONS	OPPORTUNITIES
Discover			😞 / 😐 / 😊	
Evaluate			😞 / 😐 / 😊	
Act			😞 / 😐 / 😊	
Confirm			😞 / 😐 / 😊	
Follow-up			😞 / 😐 / 😊	

Draw the emotional curve. Design for the lowest point — that's where users abandon or lose trust.

DAY 2 · WORKSHEET

Persona Anatomy

Name & role

Fictional name · real behavioural archetype

Goals (top 3)

Frustrations (top 3)

Behaviours & context

Devices, environment, frequency, workarounds

DAY 2 · CHECKLIST

AI Bias & Reliability Check

- ▶ ☐ Did I provide enough raw data, or is the AI filling gaps with assumptions?
- ▶ ☐ Are cited sources real and relevant? Spot-check at least 2.
- ▶ ☐ Does the output over-generalise from a small sample?
- ▶ ☐ Are sensitive attributes (gender, nationality, disability) stereotyped?
- ▶ ☐ Would a stakeholder challenge any claim? Mark unverified statements.
- ▶ ☐ Did I compare AI output against what participants actually said?
- ▶ ☐ Is the persona/JTBD grounded in evidence, not model fluency?
- ▶ ☐ Have I documented what was AI-generated vs human-validated?

Run this checklist before any AI output enters FigJam, Figma, or a stakeholder deck.
