

DAY 3 · PRIVACY

Data Handling Checklist for AI Tools

INPUT TYPE	SAFE TO PASTE	CAUTION	NEVER PASTE	ORG POLICY
Public marketing copy	✓			
Internal process descriptions		✓ Anonymise first		
User interview transcripts		✓ Redact PII		
Component / token names		✓ Check vendor policy		
Production database records			✓	
Credentials, API keys, classified data			✓	

When in doubt, don't paste. Summarise manually or use synthetic examples.

DAY 3 · REFERENCE

Token Architecture

LAYER	PURPOSE	NAMING EXAMPLE
Primitive	Raw values — never used directly in UI	color-blue-500, spacing-16
Semantic	Intent-based aliases	color-text-primary, color-surface-error
Component	Scoped to a component	button-primary-bg, card-border-radius
Template	Page-level composition tokens	layout-page-padding, grid-gap-content

- ▶ Rule: components reference semantic tokens, not primitives.
- ▶ Rule: one source of truth — change a semantic token, update the whole system.

DAY 3 · REFERENCE

Auto Layout Quick Reference

SETTING	BEHAVIOUR	WHEN TO USE
Hug contents	Frame shrinks to fit children	Buttons, chips, badges
Fill container	Child stretches to parent width/height	Full-width inputs, cards in a column
Fixed	Explicit width/height locked	Icons, avatars, fixed-size media
Nested auto layout	Stack within stack — row inside column	Card with header + body + footer
Min / max constraints	Prevent collapse or overflow	Text fields, responsive containers

15-minute review rule: if a frame doesn't resize predictably, check Hug/Fill/Fixed on every level.

DAY 3 · TEMPLATE

Component Spec

Component name

e.g. Card / PrimaryButton

Anatomy

Label, icon, container, divider — list all parts

Variants

Primary / secondary / destructive / disabled

States

Default, hover, focus, active, loading, error

DAY 3 · WORKSHEET

Privacy-Safe Prompt Rewrite

ORIGINAL PROMPT (RISKY)	WHAT'S WRONG	REWRITTEN (SAFE)
-------------------------	--------------	------------------

- ▶ Replace real names with 'User A', real IDs with '[REDACTED]'.
- ▶ Describe patterns, not records: 'users in the finance flow' not 'Ahmed's transaction #48291'.
- ▶ Strip screenshots with visible PII before uploading to AI tools.
