

DAY 4 · ACCESSIBILITY

Accessibility Checklist for Designers

- ▶ ☐ **Contrast:** Text meets 4.5:1 (normal) or 3:1 (large). Check with Figma contrast plugin.
- ▶ ☐ **Focus indicators:** Every interactive element has a visible focus state — not `outline: none`.
- ▶ ☐ **Labels:** Every input has a visible or programmatic label. Placeholder is not a label.
- ▶ ☐ **Touch targets:** Minimum 44×44px for tap areas. Spacing between targets ≥ 8 px.
- ▶ ☐ **Motion:** Respect `prefers-reduced-motion`. No essential info conveyed by animation alone.
- ▶ ☐ **Error messages:** Specific, in plain language, adjacent to the field. Suggest a fix.
- ▶ ☐ **Structure:** Heading hierarchy is logical (H1→H2→H3). Reading order matches visual order.

DAY 4 · GOVERNANCE

AI Ethics & Governance Quick-Reference

EU AI ACT TIER	EXAMPLES	DESIGNER ACTION
Minimal risk	Spam filters, basic recommendations	Standard UX process. Document decisions.
Limited risk	Chatbots, biometric categorisation	Disclose AI use. Ensure transparency in UI.
High risk	Credit scoring, hiring, critical infra	Human oversight required. Audit trail. Impact assessment.
Unacceptable	Social scoring, manipulative techniques	Do not design. Escalate immediately.

NIST AI RMF: Govern → Map → Measure → Manage. Apply to every AI-assisted feature in your prototype.

DAY 4 · CHECKLIST

Pre-Ship Governance Checklist

- ▶ ☐ ****Classify risk:**** Which EU AI Act tier applies to this feature?
- ▶ ☐ ****Document data:**** What user data flows in? What's stored? Who can access it?
- ▶ ☐ ****Check bias:**** Could this design disadvantage a user group? Test with diverse scenarios.
- ▶ ☐ ****Accessibility pass:**** Run the 7-point designer checklist on every screen.
- ▶ ☐ ****Sign-off:**** Name, role, date — someone accountable approves before handoff.

Feature / screen

Risk tier

Minimal / Limited / High

DAY 4 · TEMPLATE

Prototype Constraint Annotations

SCREEN / FRAME	ACCESSIBILITY DECISION	GOVERNANCE DECISION	OPEN QUESTION
----------------	------------------------	---------------------	---------------

Annotate in Figma comments or a dedicated 'Constraints' page. Devs and reviewers need to see your reasoning.

DAY 4 · SCRIPT

Usability Test Script

- ▶ ****Observation sheet columns:**** Participant · Task · Success (Y/N) · Errors · Quotes · Severity.
- ▶ ****Synthesis grid:**** Group findings by theme, not by participant. Count frequency before prioritising.

Test goal

What decision will this test inform?
