

DAY 5 · PORTFOLIO

Case Study Narrative Template

1. Problem

What was broken? For whom? Why did it matter to the business?

2. Research

What did you do? Interviews, maps, JTBD, competitive scan. How many participants?

3. Insight

The 'so what' — the non-obvious finding that changed direction.

4. Decisions

What did you choose NOT to do? Trade offs, constraints, governance calls

A portfolio case study is a story, not a screenshot gallery. Lead with insight, not pixels.

DAY 5 · INVENTORY

Atomic Design Audit

LEVEL	WHAT BELONGS HERE	YOUR FILE — LIST ITEMS
Atoms	Colour swatches, type styles, icons, spacing units	
Molecules	Input+label, button+icon, search bar	
Organisms	Header, card, nav bar, form section	
Templates	Page layouts without real content	
Pages	Templates with real content — specific instances	

If you can't name what's at each level, your file isn't systematised yet.

DAY 5 · CHECKLIST

Dev Handoff Checklist

- ▶ ☐ Component names follow a consistent convention (Component/Variant/State).
- ▶ ☐ Dev Mode enabled — spacing, typography, and colour tokens inspectable.
- ▶ ☐ All icons and images exportable (SVG for icons, 2× PNG for raster).
- ▶ ☐ Interactive states documented: hover, focus, disabled, loading, error.
- ▶ ☐ Responsive behaviour described: what changes at each breakpoint.
- ▶ ☐ Annotations for non-obvious behaviour (animations, conditional logic).
- ▶ ☐ Accessibility notes attached: contrast values, focus order, ARIA roles.
- ▶ ☐ Governance constraints page included (from Day 4).

DAY 5 · RUBRIC

Capstone Self-Assessment

DIMENSION	1 — NEEDS WORK	3 — SOLID	5 — EXCEPTIONAL	YOUR SCORE
Design quality	Inconsistent, untokenised	Coherent system, good craft	Production-grade, polished	
Process rigor	Skipped research steps	Evidence-based decisions	Full arc documented with rigour	
Accessibility	Not considered	Checklist applied, issues fixed	Baked in from the start	
AI-governance awareness	No documentation	Risks flagged, prompts safe	Full governance trail	

Score honestly. This rubric mirrors how facilitators evaluate capstone presentations.

DAY 5 · CUE CARD

60-Second Presentation Script

- ▶ ****0:00–0:15 Problem:**** 'We were designing for [users] who struggled with [task] because [root cause].'
- ▶ ****0:15–0:30 Insight:**** 'Research showed [key finding]. This changed our direction from [A] to [B].'
- ▶ ****0:30–0:45 Decision:**** 'We chose [approach] because [trade-off]. We applied [accessibility/governance] by [action].'
- ▶ ****0:45–1:00 Outcome:**** 'The result is [artefact]. If shipped, we'd measure [metric]. Next step: [what].'

Your problem (15s)

Your insight (15s)

Your decision (15s)

DAY 5 · INDEX

End-of-Week Artefact Map

ARTEFACT	LOCATION	STATUS
FigJam discovery board	FigJam · Day 1	☐ Complete
JTBD + persona + experience map	FigJam · Day 2	☐ Complete
Figma design system file	Figma · Day 3	☐ Complete
Governed prototype	Figma · Day 4	☐ Complete
Dev-ready handoff frames	Figma · Day 5	☐ Complete
Portfolio case study	Doc / slide · Day 5	☐ Complete
Takeaway reference packs	riyadh-slides.vercel.app/takeaways	☐ Downloaded

One week. One case study. One complete, ownable artefact — plus the tools to keep building.
